

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 5

77 WEST JACKSON BOULEVARD
CHICAGO, IL 60604-3590

REPLY TO THE ATTENTION OF:

Mr. Scott Dennis
Director, Environmental Services
WW Engineering & Science
5555 Glenwood Hills Parkway
Grand Rapids, Michigan 49588-0874

January 25, 1993

Dear Scott,

I received your comments and everything looks fine except for a slight addition on #3. A 5 foot well screen will of course be installed on top of the confining layer supposedly located at about 50 feet, or if not found, it should be located on top of the first significant clay layer.

As far as the issue of this being a complete and final list of additions and/or comments, I'm afraid this is something the U. S. EPA cannot promise. As the Consent Order goes through the Agency's sign-off chain, various layers of management have the authority to ask for additions and deletions to the Order itself or to the Work Plan which will be part of the Order. In addition, public comment will be asked for and could also conceivably become a part of the Order/ Work Plan. This is something that I do not have any control over and will have to be followed the way the law specifies.

Please call if you have any questions or concerns.

Sincerely

Kenneth Theisen, U. S. EPA Region V
